Experience

Visa

Austin, TX

Software Engineer

June 2025 – Present

- Engineer on Visa's **EMVCo 3DS Directory Server**, a core authentication service processing **30M+ daily online transactions** across global markets
- Implemented data-quality and recurring-transaction features with device validation, regional exclusions, app/browser flow support, and Karate regression tests
- Validated **HSM key-management flows** for payment authentication infrastructure, including AES/3DES key wrapping, RSA device-decryption flows, simulator testing, and FIPS-mode compatibility
- Designed and built an **LLM-powered regression analysis agent** using LangGraph and MCP servers, automating failure categorization and test case remediation across regression scenarios; adopted by **5+ teams**
- Built **CodeGrepper**, a full-stack TypeScript tool using Claude Agent SDK and custom MCP servers, enabling non-technical product owners to query codebases and Postgres/Redis configurations in natural language

Chevron

Houston, TX

Software Engineer Intern

May 2023 – August 2023

- Developed a web app to enable **5,000+ employees** to report incidents efficiently, increasing reporting accuracy by 23%
- Built an AI model on ServiceNow to automate tech support routing, **reducing resolution time by 30%**
- Designed a Cloud learning pathway that **cut employee onboarding time by 35%** across infrastructure teams

BidOut/Breaker19 ↗

Houston, TX

Product / Project Management Assistant

September 2023 – December 2023

- Supported the Breaker19 web and mobile launch by coordinating product scope, engineering execution, and release planning, achieving a **43% faster deployment timeline**
- Improved product quality by triaging bugs, reviewing implementation with developers, and wireframing **15+ mobile screens** in Figma, reducing bugs by **50%**

Projects

Unison ↗ - React.js, TypeScript, Node.js

- Built a React/Node app for contact modeling, reminders, and relationship context
- Raised pre-seed funding; joined OwlSpark/RedLabs and engaged Y Combinator

Lattice ↗ - TypeScript, Next.js, Docker, AWS S3, Cloudflare

- Built a self-hosted knowledge system that mirrors an Obsidian vault from S3 to a Raspberry Pi with a web UI
- Containerized Next.js, QMD retrieval, OpenCode query, sync-worker, and scheduler services with Docker Compose
- Secured external access with Cloudflare Tunnel and Access while keeping retrieval, query, and sync services internal-only

Homelab Automation - Ansible, Docker Compose, WireGuard, Portainer, Cloudflare

- Wrote Ansible playbooks and roles to rebuild a Debian/Raspberry Pi home server with Docker, Portainer, WireGuard, OpenClaw, Plex, ntfy, and Cloudflare Tunnel services
- Implemented Vault-backed secrets, generated Compose configs, systemd-managed services, and preflight guards to avoid overwriting existing deployments

Technical Skills

Languages: TypeScript, Python, C/C++, Rust, Java, SQL

Tools & Frameworks: React, Node.js, LangGraph, Redis, Jenkins, Karate, Docker, Postgres, AWS, Azure

Certifications: CompTIA Pentest+, Microsoft Certified: Azure Fundamentals, Certified SAE 6 Practitioner

Education

University of Houston

Houston, TX

Bachelor of Science in Computer Science

December 2024

Bachelor of Business Administration in Finance

December 2024

Leadership

CougarCS ↗

Houston, TX

President

December 2022 – December 2023

- Led a team of **16 officers** for the largest computer science organization at the University of Houston
- Partnered with over **10 companies** to provide employment opportunities for **1,000+ students each semester**
